 Spinach,  
 Turnip.

**ESTABLISHED 31 YEARS.**

**W**E herewith present our Twenty-ninth Annual Illustrated Catalogue containing a list of things necessary for the Farm, Garden, Lawn, Greenhouse, Dairy, Poultry Yard, etc., also call special attention to our tin shop, where everything in the line of tin and galvanized iron work is promptly done. We are better prepared than ever to meet the full requirements of our trade, and thank our many friends for past favors and generous patronage.

For thirty-one years this house has been located in the same block, having been established in 1868 by Mr. A. D. Perry. We are pleased to announce that never before have we been better able to meet the requirements of our trade than at the present time. This firm is the only strictly seed-house in Central New York. Importing the finest and choicest varieties of flower and garden seeds—as well as dealing in all the more common sorts of field and garden seeds, implements, drain tile, hardware, etc., and which this catalogue will more fully explain.

Very sincerely,

F. H. EBELING.

**Etablirt 31 Jahre.**

Wir übergeben dem geehrten Publikum hiermit unseren 29sten jährlichen Catalog für das Jahr 1899. Derselbe enthält eine vollkommene Liste der auserlesensten Sorten frischer Garten-, Feld- und Blumen-Samen, sowie von allen Artikeln, welche für den Landbau, Garten, Allee, Treibhaus, Molkerei, für den Hühnerhof u.s.w. nöthig sind. In Verbindung mit unserem Laden haben wir auch für die Bequemlichkeit unserer Kunden eine Blech- und Klemmer-Werkstätte eingerichtet, auch besorgen wir galvanisirte Eisenarbeit. Wir sind besser wie je vorbereitet, den Wünschen des Publikums in unserem Geschäftszweige nachzukommen und danken wir unseren vielen Freunden für die soweitige kräftige Unterstützung, welche uns in solch' reichem Maße zu Theil wurde. Dreißig Jahre war unser Geschäftshaus in ein und demselben Häusergeviert lokalisiert; gegründet wurde dasselbe im Jahre 1868. Dies ist das einzige wirkliche Samen-Geschäft in Central New York. Wir importiren die besten und seltensten Samenarten vom Auslande, eigens von Sachverständigen für unseren Laden auserlesen. Wir halten auch Ackerbau-Geräthschaften, Handwerkszeug, Drainir-Ziegeln, Eisenwaaren u.s.w. stets auf Lager. Alles Nähere besorgt dieser Catalog. Herr F. H. Ebeling, der Eigenthümer, macht es sich zur besonderen Aufgabe, alle seine werthen deutschen Kunden in ihrer Muttersprache zu bedienen und ist es sein stetes Bestreben, durch freundliche und zuvorkommende Bedienung ihre Kundschaft und ihr Wohlwollen zu erwerben und zu erhalten.

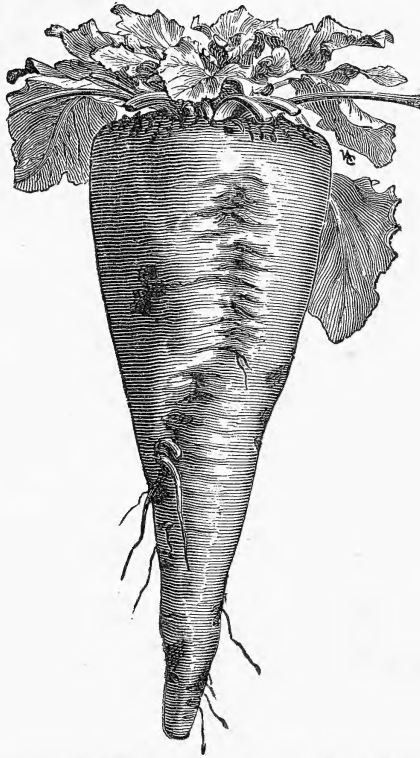

Achtungsvoll zeichnet, F. H. Ebeling,

Eigenthümer des Perry Saamen-Laden,

217 Warrenstraße, Syracuse, N. Y. (dem neuen Postamt gegenüber).

# NEW THINGS FOR 1899

It comes in soon after Cory begins, and about the same time as Minnesota; ears 8 to 10 inches long and white; number of rows varying from 10 to 16, with the majority 12; kernels broad, white, sweet and running well to the tip and of excellent flavor; stalks short, bearing close planting and seeming to throw their whole strength into the ears, of which there are often two on one stalk, making it enormously productive. It was first introduced to the trade in 1897, though in limited quantities. We have received numerous letters extolling its great worth.

## Excelsior White Dutch Cabbage Seed. Late. Large, Round Solid Heads.

Has stood the trial test in this country during three years, and is highly recommended by leading growers and seedsmen. A word from an American market-gardener, who has been supplied by me with seed of the above Cabbage. Mr. Jacob Wride, market gardener, of Auburn, N. Y., writes under date of January 26, 1897: "In regard to the cabbage, *they were the best I ever raised*, and I have been raising cabbage for 20 years. The average weight was from 12 to 18 pounds, and they often weighed 25 pounds. They are good keepers and do not rot, as other kinds often do. The quality was of the best, and the color could not be better. I set 8,000 to try them, and will raise no other this year."

**Evan's Triumph Celery.** The stalks of this new variety do not grow as large with us as those of the Giant Pascal or Kalamazoo, but are larger than those of Boston Market or White Plume. It has a compact habit of growth and is a fine keeper. While it is crisp, brittle and tender, it has a stronger celery taste than any other variety. We recommend it as a good late keeping sort. Lb. \$3.50, oz. 30c.

**Banana Cream Sweet Corn.** This is rightly named. A most perfect sweet corn; delicious, tender and fine flavored variety. The finest later variety on the whole list of sweet corn. Qt. 25c, bu. \$3.50.

**Mammoth White Twelve Rowed Cory Corn.** The largest and best of all the first early sorts to be found. This is a great acquisition and will be greatly appreciated by the market gardeners. Price 25c, one-fourth bu. \$1.50.

## The New Musk Melon "PAUL ROSE." Mr. Paul Rose writes:

"I have found in my experience of nearly twenty years in melon growing, that there is an increased demand in most of the large cities of the Northern States for salmon-fleshed melons, and further that the trade prefer their melons in the half-bushel climax basket. For this reason I have labored to bring this melon to perfection, and by what you have already seen and learned of it, and by what the trade says of it wherever it has been introduced you can judge whether I have succeeded in supplying the 'long felt want' or not. The Osage is too large for a basket melon. The Emerald Gem will not stand transportation or warm weather, besides it grows all sized melons on the same vine. The Paul Rose corrects these faults, and will carry farther, stand up longer, and give better satisfaction than any salmon-fleshed melon I have ever grown. It is the best melon I have found for the North. My experience

with it in Southern Indiana the past season was highly satisfactory except that it grows a little larger. I shall discard the Osage and plant the Paul Rose melon instead. This melon I shipped this season to Pittsburgh, Cleveland, Toledo, Indianapolis, Chicago and other distant points, and in every instance it arrived in good condition and sold for top prices." Pkt. 10c, 1/2 oz. 15c, oz. 25c.

**Choice Cauliflower Seed.** This we import always from the same growers and for several years have not had one failure. It will produce a greater number of perfect heads than any other strain of cauliflower we ever saw. Of all the varieties that have been tried in this market *our strain of Erfurt has given the best satisfaction*. We have our usual stock of Perry's Erfurt, also Long Island Beauty, Snowball, Denmark, and Half Early Paris. For prices see our list, page 3. We assure you the quality is always the same and no cheap seed offered you in its place. There is no better cauliflower seed in the market, even if you pay fancy prices for others. Our price is \$3.00 per ounce.

# NEW THINGS FOR 1899

## SUCCESS BARLEY.

This valuable new Barley originated with A. B. Jones, a successful barley grower in South Dakota. Mr. Jones has been experimenting for years in trying to get a good and productive Barley without the unpleasant and **sharp beards** possessed heretofore by all our best barleys. Everyone who has raised and fed barley knows the inconvenience of these sharp and troublesome beards. They not only make it unpleasant to handle, but are very injurious to animals in feeding, as they often get fast in the horse's mouth and under the tongue, causing injury and uneasiness to the animal and sometimes death. On this account many feeders have discontinued the use of barley, as it is almost impossible to get rid of these sharp beards. To get a variety that would grow without beards, and at the same time possess all the rich and nutritious qualities of our bearded sorts, has puzzled the brains of prominent agriculturists for years. This has finally been accomplished, after many trials and experiments, by hybridizing and cross fertilization with our most productive bearded varieties and the bald, hullless barley, which has little value for feeding purposes. **The Success** is a beardless variety. It is a **six-rowed barley of unusual length of head, well packed with solid, plump grains clear to the tips.** It is one of the first to ripen, hence valuable to plant either in the extreme North or extreme South, as well as in all other sections of the country.

**Its great productiveness.**—From a single head taken from our field the past summer we counted seventeen grains to the row, and as every head has six rows of grains, this would make at the rate of two hundred and four bushels to the acre, assuming two bushels were sown to the acre and every grain grew. Dividing this product by two, or taking one-half, it still leaves an enormous yield, or one hundred and two bushels to the acre. **It is undoubtedly one of our best yielders.**

## SWEET CORN.—“FIRST OF ALL.”

The Earliest of All;—Earlier than the Early Cory.

The single statement on the preceding line will make thousands of our customers eager to have the **FIRST OF ALL Sweet Corn**, which is ready for the table from *three days to a week earlier than the Cory*, making it very desirable not only for family gardens, but extremely valuable to grow for market, where the earliest corn always brings by far the highest price. The illustration, engraved from a photograph, reduced in size, shows the form of the ears, which are of medium size, well filled with large grains to the very tip. Many of the ears contain ten to twelve rows, while ears of the Cory Corn generally have only eight rows. In habit of growth it is rather dwarfier than the Cory, although similar in appearance, but *superior in quality*, tender and sweet. Per pkt. 10 cts.; pint 25 cts.; per quart 40 cts., postpaid.

## THE AUSTRALIAN BROWN ONION

is of medium size, wonderfully hard and solid, and most attractive for market, both as to form and appearance. They are **extremely early** in ripening, and *never make any stiff-necks or scullions*. Every seed seems to produce a good sized onion, and the bulb begins to form very quickly—when the plant is not over three inches high. Planted with the *Red Wethersfield*, it proved to be *nearly four weeks earlier* and ripened off more uniformly. It has the reputation of keeping indefinitely, and we think from its firmness and hardness that it **will keep in good condition longer than and other Onion known**. The color of the skin is a clear amber-brown.

## SPRING RYE.

We offer a fine crop of **SPRING RYE**, at \$1.25 per Bushel.

## SPRING WHEAT.

We can supply the **CHINA T SPRING WHEAT**, at market prices.

## SEED OATS.

We offer choice well cleaned, true to name, varieties of **SEED OATS** at reasonable prices.

## DWARF ESSEX RAPE.

The true **Dwarf Essex Rape** is valuable as a fattening food for pasturing sheep in autumn. It is particularly adapted as a “catch crop,” for it grows best late in the autumn. In the Northern States it can be sown at any time from May until the end of August, but in the Southern States it should not be sown until September or October for winter pasture. Its fattening properties are said to be twice as good as clover. Sow ten or twelve pounds per acre on drills fifteen inches apart. Per pkt. of 2 ozs. 10c.; per lb. 30c. postpaid by mail. By express or freight, 10c. per lb.; 25 lbs. for \$2.25; 50 lbs. for \$4.00.

## MAMMOTH PRIZE PIE PUMPKIN.

Weight 116 1-2 Pounds.

We offer the seed of this Monster Prize Pumpkin at 10 cents a package. This Pumpkin took first prize at our fair, and after exhibiting it in our window for a long time it was divided among our friends and several bakers, who all pronounced it the **Finest Pie Pumpkin** they ever used. This variety is of fine grain, thin shell, and will keep for a great length of time in any dry place.

# Mower and Trimmer Combined

SOMETHING ENTIRELY NEW.

The "PASTIME" cuts the grass within one-eighth of an inch of a tree, fence or walk, thereby necessitating **no trimming** with shears or sickle.

The "Old Style" will not cut within  $3\frac{1}{2}$  inches of a tree, fence or walk, and shears or sickle must be used to finish the lawn.

After going over entire lawn with mower (as shown in cut), you have only to remove side-wheel (see cut), which requires **five seconds**, and your mower is converted into a perfect trimmer, that will trim to one-eighth of an inch of any walk, fence, tree, etc.

Both wheels are removable if double side trimmer is preferred, and the front of mower is then guided by the handle. The "PASTIME" with side wheels on cuts to within 2 inches, and off to one-fourth inch of walks, etc. **The large wheels of the "Pastime" NEVER go over unmown grass.**

## Weed Digger.

This ingenious device for the extraction of weeds from lawns, differs from all others now in use. Being forked, it comes on each side of the root, and the downward pressure brings the root into the crotch, where it is instantly cut. You then use the fork for lifting out the weed and throwing it into basket, and moving basket as you move along.

*The forks are made of STEEL, beveled to a knife edge, and can be kept sharp with a file.*

**DIRECTIONS:** Drive the Digger so as to cut the root, at least two inches from surface (as shown in cut). Before drawing out Digger twist it enough to break the earth about weed, so that weed will lift out without bringing any dirt with it.

## Urns, Vases and Settees.

We offer a fine variety of styles in various sizes suitable for lawns, front yards, cemeteries, parks, etc. These can be furnished to order on short notice, at reasonable prices.

For full particulars, write or call and see us.

## folding Plant Stands.

Something new. Prices low. Takes up little room when folded. Strong, handsome and durable.

## Trellises, in Wood and Wire.

We carry a large assortment of Trellises in wood and wire, in all lengths and widths. Special sizes made to order.

**40,000 SOLE TILE OFFERED AT A BARGAIN.**

# FLOWER SEEDS.

## KEY TO CULTURE.

**A.** Sow for succession from April to June for summer and autumn blooming. Prepare the ground thoroughly by digging, adding a good supply of leaf mould or well rotted manure, making the surface fine and smooth.

**B.** Sow in gentle heat, in a well drained pot or pan of light soil. Sow thinly and cover lightly with a fine sandy soil. Shade from bright sunshine, and water when necessary through a fine rose watering pot. Transplant to open ground when all danger from frost is over. The seed may also be sown in a cold frame in April, or open boarded in the latter part of May, but will not flower so early. Transplant or thin out before the plant gets too large.

**C.** Sow from April to June, or in August, in a well prepared bed of light soil, covering the seed lightly. Keep clear of weed, and thin out the plants, if too thick, sufficiently early to allow them to develop their growth.

**D.** Sow in spring in a well drained pot or well prepared hotbed of light, peaty or sandy soil. Place in a moderately warm temperature. Shade from bright sunshine and keep moist, transplant when ground is in proper condition, or in open ground after May 10th for late flowers.

**E.** Sow in open border in April or May, and thin out or transplant, giving each plant plenty of room.

**F.** Sow at any time in a pot prepared as follows: Let the pot be one-third full of drainage or broken charcoal; over the rough siftings of mould, and the surface with very fine soil, half of which should be composed of fine, sharp sand; water with fine sprinkler; scatter the seeds thickly over the surface, cover very lightly; keep from direct rays of the sun. As soon as the plants show the third leaf, transplant into seed pans, three-fourths of an inch apart, giving a little air to strengthen them. When the plants begin to touch each other, they should be transplanted singly into small pots and keep them in a cool, airy part of the green house near the glass. Re-pot them when necessary.

The following portion of our catalogue, devoted to Flower Seeds, we have arranged both alphabetically and in columns, to enable any one to easily refer to the price and description of any variety desired.

NAME.	Hardness and Duration.	Height - Feet.	Color of Flower.	Culture.	Per Pkt.	GENERAL OBSERVATIONS.
Aster, Truffaut's La Superbe.....	hA	2	pure wht.	D	10	<b>Aster.</b> No lover of these flowers can find anything so easily cultivated that would afford such genuine pleasure and satisfaction. The New Washington varieties are extremely beautiful, attaining a very large size averaging 4½ inches in diameter, and in delicacy of tints are unequalled. Aster seed should be sown early in the Spring in a hot-bed or window box and transplanted out-doors when the weather is warm, about 12 inches apart—the taller varieties a little farther apart and the dwarf varieties a little nearer together.

Wire Plant Supports.	Silkalene per Ball, 30 cts.	Bird Supplies.

**BOLTON SETS.**  
(Natural Size)

## BOLTON ONION SEED AND SETS

After many years we have finally succeeded in securing the SEED for the celebrated Bolton Onion Sets. For years past it has been so carefully guarded by the few who had controlled this fine variety, that until recently we were unable to secure the Seed. The Bolton Set has no equal in the United States for market gardeners' purposes.

First—Its quick growth into a handsome green onion, being the earliest set on the market.

Second—Quality, mild. A perfect onion shape, even to the smallest among them.

Third—Unequaled for its market qualities and value to the gardeners.

Fourth—Growing into a large onion of fine quality for fall and winter use, if permitted to remain in the ground.

We have a limited stock of seed to offer this season at \$3.00 per lb.

## THE IRON AGE GARDEN IMPLEMENTS.

"We want higher wheels." "The tool is too heavy." "The castings break too easily." Such expressions coming from users of various wheel hoes, together with our own practical tests, convinced us that however well supplied the market may be with these tools, and though excellent they may be, there was needed further improvement in this line. Hence the "Iron Age" Wheel Hoes.

We would call attention to the most salient points of improvement; very light steel wheels, 16 inches in height; high arch, capable of working 20-inch plants: tubular frame, coupled to malleable castings, giving extreme lightness with freedom from breakage; wheels quickly adjusted in height without entirely removing the axle nuts; they not only can be placed inside the frame for working in narrow spaces, but *an extra axle is sent out with each tool*, making a perfect Single Wheel Hoe. We emphasize this point strongly, as a single wheel is certainly preferable in all garden work, with the single exception of working astride the row. The vine lifters are adjustable in height, and without entirely removing the confining nut.

The tool is fully equipped with side hoes and plows, finely shaped and polished, while the slender steel cultivator teeth are particularly adapted for thorough and deep cultivation, even in very hard soil. A pair of rakes is also included, which do admirable work in various ways, particularly in destroying young weeds, and fining the soil preparatory to seed sowing. We do not claim these as a novelty, having been used long since under the expired Comstock patent.

We wish to strongly emphasize the really extraordinary ease with which the "Iron Age" Wheel Hoe is operated, the lightness and construction of the tool being such that every ounce of effort goes direct to the work accomplished.

IRON AGE DOUBLE OR SINGLE WHEEL HOE.

Price \$6.00.

Fig. 76.

Showing the Double Wheel Hoe set up as a Single Wheel.

Fig. 81.

The Weeder Attachment. Price, per pair \$1.00.

IRON AGE COMBINED SEED DRILL AND WHEEL HOE.

Packed Weight, 50 Lbs. Price, \$9 00.

tool possible. It is a whole toolhouse in itself. It plows, levels, furrows, sows, covers, rakes, cultivates, hoes and hills, and does each and every operation in the most satisfactory manner.

In designing our Seed Drill Attachment for the Double Wheel Hoe, we have kept in view simplicity of construction, convenience of adjustment, and perfection of work.

The drill attachment is complete in itself, and when put in place requires but two bolts to secure it; the single wheel is then put in position, the chain run on, and the drill is ready for operation. The seed slide and its index adjustment to sow the various seeds is similar to that used on our well known New Model Seed Drill, while the agitator is simply a revolving brush of selected bristles, which will not injure the seed, wear a long time, and can be cheaply replaced.

The opening plow is adjustable in depth, and also reversible, one end being wide for onion seed, and the other narrow for placing the seed in a close, straight line. In place of a covering roller we use a small steel smoother--doing the work of a roller, with none of its weight and clumsiness. This, together with the coverer, to which it is attached, is adjustable to suit various soils and depths of covering.

The Combined Drill includes all the attachments above, and we claim that anyone buying it possesses at once the most complete and perfect

# THE IRON AGE GARDEN AND FIELD IMPLEMENTS.

THE "JEWEL" DOUBLE AND SINGLE WHEEL HOE ARE "LEADERS" and stand first in everything of their kind. With the exception of the handles and wheels they are made entirely of malleable iron and steel. With each tool there are a number of attachments, making the Wheel Hoe suitable in cultivating all kinds of crops.

THE JEWEL DOUBLE WHEEL HOE, \$4.00.

The "Iron Age" Combined Harrow and Cultivator.

For a cultivator thoroughly made, and of high quality, one could not do better than buy the "IRON AGE." Strong, light and handsome.

SINGLE WHEEL ATTACHMENT.

THE GEM WHEEL HOE.

Price, \$4.00.

The "Gem" is the most practical tool for every-day use that is offered to the gardening public. It is made largely of steel and malleable iron. It is strong, yet light in appearance and well finished. This is just the tool for your garden, as you see by the cut it can be made into either a single or double wheel hoe.

POTTER'S WEEDER ATTACHMENT.

THE NEW MODEL SEED DRILL.

Price \$7.00.

We place the New Model Seed Drill at the head of the list, because there is where it properly belongs. This drill contains all the good points of every old drill in the market, with this point in addition: the slide, or hole through the slide where all the seeds have to pass, is adjustable, and the slide can be changed to a fraction by the operator, thus admitting exactly the quantity of seed required. The hole is diamond shaped, which is another advantage for rough or irregular shaped seed. CUT-OFF--The flow of seed can be instantly stopped by a swinging cut-off, conveniently operated by a cord and ring on handle. This cut-off prevents all loss of seed at ends of rows, and its swinging or gravity form will be found far preferable to one that slides under, as it cannot injure the falling seeds.

# "Acme" Seed-Drill

FILLS the long-felt want for a Handy Garden Seed-Drill. Cheap but practical.

This Practical Drill

Sent you for \$1.25. Isn't It Cheap Enough?

...BY USING THE...

## "Acme" Garden Seed Drill

You secure a better stand.

You get healthier and stronger plants.

You don't waste any seeds.

You save time. The work is easy.

## A GARDEN SEED-DRILL

that will distribute Beet, Cabbage, Carrot, Radish, Turnip, and all other such seeds with PERFECT REGULARITY. It is utterly impossible for it to sow anything but accurately, doing the work as thoroughly as the costly machines, and will cover TEN TIMES the ground that can possibly be covered by hand. It is simple in construction, so easily understood that a child can be instantly taught to use it; so simply constructed it is impossible to get out of order.

## Mastica, for Glazing

Greenhouses, Sashes, etc., new and old. It is elastic, adhesive and easily applied; it is not affected by dampness, heat or cold.

Every florist has experienced difficulty in obtaining putty (whether ordinary or white lead) for glazing, that is satisfactory for any length of time. The fact is, putty is not adapted for greenhouse work. After much study the inventor of "Mastica" decided that the composition must be of different material, and the qualities must be elastic and tenacious to admit of expansion and contraction without cracking. "Mastica," when applied, in a few hours forms a skin or film on the entire mass, hermetically sealing the substance, and preventing the evaporation of the liquids, and remains in a soft, pliable and elastic condition for years. "Mastica" is of great value in going over old houses with a putty bulb or maching on the outside of sash, as it makes it perfectly tight and saves the expense of re-laying the glass.

MASTICA  
GLAZING  
MACHINE  
\$1.25 each.

Prices of Mastica (soft for machine application)..... $\frac{1}{2}$  gallon 75c. ; gallon \$1.25.

## GALVANIZED IRON BASKET and BERRY BASKET.

FOR  
POTATO  
BUGS

**Beat This If You Can.** Quick Work, Cheap Price. **\$3.50**

*One man does the work of twelve and need not stoop down either.*

Prepare your Paris Green or London Purple in a pail or barrel of water, one teaspoonful to the pail. Make a paste of it, and then mix it good that no little lumps are left, fill the apparatus and stand it on a bench or barrel. Put it on your back and proceed with your work. You will do more work than twelve men with a whisp broom. Move your hand from right to left, etc. You will find that you will sprinkle your potatoes as fast as you walk, from 12 to 15 feet on each side of the path, and your vines will look as if covered with a fog or dew. The spray is controlled in your own hand. You can spray far or near as you wish. **NO WASTE WHATEVER.** No large drops like from the whisp broom or other methods, which largely hurt the plants. For the Cotton Worm, Cabbage Worm, Tobacco Plants, etc., use in the same manner. For shrubbery, young fruit trees, hops and grape vines, turn the hose upward. You can throw a mist 12 to 15 feet high; you will get a regular misty shower or vapor spray on the under side of the leaves. Spray stops by relapsing pressure of the thumb.

Truck Only, \$7.00;  
With Barrel, \$9.00.

With Wheels 1½ Inches Tread.

As Fast as You Walk.

NOTE THE FOLLOWING.—Mr. Oney Sayles, of Bridgeport, says: "I sprayed my trees and picked 1,010 bushels of apples, which brought me 25 cents per barrel more than unsprayed fruit. My spray pump cost me \$8.00, and was the cause of saving me over \$100 cash. I used London Purple in spraying."

SYRINGES. \$1.00, \$2.25, \$3.00, \$4.50.

**THE ELECTRIC OR LIGHTNING INSECT EXTERMINATOR.**

Simple, Practical, Effectual, Cheap.

Price, 75c.

The most economical, cheap and effectual device for applying Paris Green with little labor. Death on Potato Bugs. Paris Green applied with this machine will knock them stiff, all sizes and ages, every time. Only one pound required for an acre of potato vines. Experience has proven that Paris Green applied does not injure the vines, and is far more effectual than when mixed with plaster, etc."

**Kill, Exterminate or Drive Away Every Living Thing Obnoxious to Yourself, Animals or Crops by Using the**

## **LIGHTNING BUG EXTERMINATOR.**

[Patent Applied For.]

Fig. 1 represents the reservoir detached so that it can be cleaned or liquids changed, which is done by simply unscrewing the reservoir, and at all times to see that the machine is in proper working order.

Fig. 2 shows the Reservoir attached ready for work, with a funnel-shaped hole for filling. To remove the plunger from the air chamber simply twist the little cap at the rear of the air chamber, which unlocks, and draw the plunger out, in case it becomes hard or dry. At all times the leather should be kept oiled.

THE GREAT LABOR SAVER....

### Wheeler's Gravity Cream Separator.

A new device to separate cream from milk by the dilute process, which reduces the viscosity of the milk, thereby securing the cream in two hours. No ice to handle; no cranks to turn; no machinery to run and keep in repair.

It is always ahead of the best Creamery, being the *cheapest, best and easiest* device to handle milk on the market, and you will make no mistake if you investigate its merits.

Those that keep only one or two cows, as well as the large dairymen, can have the advantage of a separator at a small cost, compared with the centrifugal separator or creamery.

Sizes made to fit and dairy from one cow up. State the number of pounds of milk you have to separate each day, and we will quote prices.

#### PRICE LIST OF GRAVITY CREAM SEPARATOR.

No. 0, for 1 to 2 cows, capacity	60 lbs. milk per day	\$ 4 00

"SOU" FODDER.

## LEAMING CORN.

This popular and distinct variety of yellow dent corn certainly has, beyond question, reached the grandest success of any yellow dent corn that has ever been brought before the American public. This corn is too well known to enter into a detailed description of its merits here; suffice to say that it is a very uniform, medium sized, very early (maturing in 90 to 115 days), very heavy, long eared corn, with stalk growing medium tall, and very thick and strong. Our farmers were very successful last season. The sale will be much increased in the future for ensilage.

## PRIDE OF THE NORTH.

By selecting and being grown for many years in Northern Wisconsin, has become quite distinct and is now about ten days earlier than the Leaming, and grows two feet less stalk. We carry stock of the Pride Corn and we will always supply you at lowest market price.

## SWEET CORN

For ensilage purposes we offer at a very reasonable prices.

## FIELD CORN.

We have a fine stock of White Canada Flint, Angel of Midnight, Early Smut Nose, and other varieties in traces and shelled.

## THE WIARD ADJUSTABLE WEEDER.

Used with great profit on planted crops, and especially useful on wheat fields in early spring, when all weeds that may have started are eradicated and the soil made loose and friable, and in the best condition for the growth of grain. The steel teeth of this weeder may be adjusted to stand straight or sloped more or less, by simply changing the position of the bolts in the adjusting irons, adapting it to all conditions of soil. By using this weeder, fields of corn, beans, potatoes, etc., can be kept clean of weeds without the labor and expense of the hoe and without damage to the plants. One trial will convince any farmer that he cannot afford to be without this implement. **Price, \$9.00.**

## WHEELBARROW SEEDERS

WITH RUBBER, WIRE OR TWINE DISTRIBUTORS.  
WITH WOODEN OR IRON FRAME.

THEY CAN BE WORKED BY ANYONE WHO CAN RUN A WHEELBARROW.  
PRICE, \$6.00 TO \$8.00 EACH.

## THE LITTLE GIANT SEED SOWER.

This is the cheapest Crank Seeder on the market, and equal to the best for quality of work it does and durability. Don't pay \$5.00 for a seeder when you can get its equal for less money.

### They Recommend Themselves on Sight.

- They are the lightest running.
- They place the operator in an easy position.
- They only need a trial to prove their superiority.
- They save one third seed and two-thirds labor.

CRANK SEEDERS,	-	-	-	-	\$2.00.
FIDDLE	"	-	-	-	1.75.

## THE EMPIRE COMBINED CORN DRILL, \$17.00.

IS the only corn drill manufactured that has a *positive force feed fertilizer attachment.*

The discharge of corn and fertilizer can be seen at all times by the operator.

The weight is adjusted so as to equalize it and place a large share on the front wheel, relieving the blades and making the weight on the blades nearly the same when box is full as when empty.

It has independent levers to throw both corn and fertilizer attachments in and out of gear, and will drill from 23 to 120 quarts of fertilizer per acre, and drop corn from 8 to 30 inches apart.

Furnished with or without fertilizer attachment, and with wheel or blade covers, as desired.

It has a brush cut-off which guarantees no breaking of grain.

Two plates are furnished with this corn drill, one for large and one for small corn.

# The Improved Robbins Potato Planter.

A machine that is completely and thoroughly successful. Has none of the faults of other planters, and does better work than planting by hand.

**NO MORE DREAD OF POTATO PLANTING TIME.  
FULLY GUARANTEED.**

Call and see it or send for Book. Will plant Potatoes, Beans, Corn, Peas. etc., with or without Phosphate.

We refer you to these gentlemen who are using them: C. C. Wilcox, Oswego Falls, N. Y., T. A. Mitchell, Weedsport, N. Y., Mr. Pendergast, Phoenix, N. Y.

**DITCHING PLOW. Price, \$9.00.**

We have secured for our farmers in Central New York a very low priced Ditching Plow, one that has both handles and draw hook adjustable and can be changed, "as you see," very rapidly, plowing to the depth of four feet. The ditches can be made with this plow at a cost of from 10 to 12 cents per rod. Hugh Oliver, of Marcellus, N. Y., now using one of these plows, says he would not be deprived of it for \$50.00. It is just the plow for ditching. Price of plow complete, \$9.00.

**HALLOCK'S POTATO DIGGER. Price, \$14.00.**

Refer to Edgar Bowen, Onondaga Valley, Asylum for Feeble-Minded Children, Ed. Benscoten, C-n-ondaga Valley, and others who have used these diggers.

We Sell the Cooper's  
Sheep Dipping Powder.

The finest in America, used by all the ranchmen in the west, sure cure for scab and ticks. We could show you a list of testimonials a yard long if necessary, but those we have from firms so well known among sheepmen will be all that is required to convince you we have the best. Sold at factory price, 50c. and \$2.00 a package. Small packages will make 25 gallons, large packages 100 gallons ready for use. An unprecedented demand has set in all over the States for our celebrated Cooper Sheep Dip, consequent upon the favorable verdict of sheepmen who have used it. Other preparations are being relinquished, as "Cooper" is found far superior in every way.

# A FEW STOCKBRIDGE ONIONS.

Photograph of  $\frac{1}{2}$  acre field of onions grown by John H. George, of Methuen, Mass., on Stockbridge Onion Manure exclusively, entered for field premium at the Essex County Agricultural Society. Yield on the  $\frac{1}{2}$  acre,  $448\frac{1}{2}$  bushels of fine onions. Applied 1,000 lbs.

**HILL AND DRILL PHOSPHATE, AMMONIATED DISSOLVED BONE, FARM AND GARDEN PHOSPHATE, SUPER PHOSPHATE WITH POTASH, SURE CROP PHOSPHATE, WOOD ASHES, KAINIT, NITRATE OF SODA, HOP AND POTATO WITH EXTRA POTASH.**

## SPECIAL MANURES.

		<i>For one acre without stable manure*</i>
Stockbridge Potato Manure,	per 100 lbs., \$2.15	1,200 to 1,800 lbs.
“ Corn and Grain Manure,	“ 100 lbs., 2.15	800 to 1,500 lbs.
“ Vegetable Manure,	“ 100 lbs., 2.15	1,500 to 2,000 lbs.
“ Cabbage and Cauliflower Manure,	“ 100 lbs., 2.15	1,800 to 2,500 lbs.
“ Onion Manure,	“ 100 lbs., 2.15	1,500 to 2,000 lbs.
“ Vine Manure (not peas or beans)	“ 100 lbs., 2.15	1,500 to 2,000 lbs.
“ Pea and Bean Manure	“ 100 lbs., 2.15	1,000 to 1,500 lbs.
“ Root Manure,	“ 100 lbs., 2.15	800 to 1,200 lbs.
“ Asparagus Manure,	“ 100 lbs., 2.15	1,200 to 2,000 lbs.
“ Celery Manure,	“ 100 lbs., 2.15	1,500 to 2,000 lbs.
“ Lettuce and Spinach Manure,	“ 100 lbs., 2.15	1,500 to 2,000 lbs.
“ Strawberry and Fruit Manure,	“ 100 lbs., 2.15	1,000 to 1,500 lbs.
“ Tobacco Manure,	“ 100 lbs., 2.15	1,500 to 2,500 lbs.

The above quantities recommended for one acre are without stable manure; but, if stable manure is used in connection with the Stockbridge, then a smaller amount can be used, depending on the amount of manure applied and its richness. About one-half the quantity of each is the rule.

The first column gives the usual quantities which farmers apply, and the second column the usual quantities which market gardeners apply.

We are Sole Agents for these celebrated Phosphates. Sold strictly for Cash at a very close margin or profit. Fully guaranteed as being equal or superior to the best on earth.

**SPECIAL PRICES FOR CASH.**

## Hall's Reversible Car.

Is Made Entirely of Malleable Iron. Light and Durable. It Runs Both Ways on the Track Without Changing.

PRICE, = \$5.00.

This car runs on a wooden track, 4 x 4, or it can be made of 2 x 4 nailed together, suspended by the iron hooks which we furnish at \$1.00 per dozen. Any carpenter can put this car in shape to run at a small expense.

Double Harpoon Forks.....	\$ 1.00
Pulleys in Wood and Iron, each.....	.25
Rope, best Manilla at lowest prices.	
The Kershaw Iron Rod Car.....	6.00
The Ney Hay Car, for wood track.....	4.00
The Sprout Car, for wood track.....	3.00

We have the Teeth for these Rakes and Tedders.

## BULLARD HAY TEDDER.

There is no investment a farmer makes that pays better than a **BULLARD HAY TEDDER**. Over twenty years in use and the first machines made still running. Belcher & Taylor are now making two sizes—One and Two Horse, with parts interchangeable. Prices very much reduced. Give us your order early. We keep the extras always in stock.

DISK HARROW, \$20.00.

“Acme” Pulverizing Harrow, Clod Crusher and Leveler.

Price, = \$14.00

Warranted  
Against Breakage  
for  
One Year.

The “Acme” is the cheapest riding harrow in use—in fact it costs about the same as an ordinary drag, and is, therefore, within the reach of all who have use for harrows. Being made entirely of cast steel and wrought iron, it is indestructible. Nothing but the coulters can possibly wear, and these are readily replaced at trifling cost.

TRIPLE  
HARROW  
AND  
WOOD DRAGS.

PRICE,  
\$6.00 to \$13.00.

# ADRIANCE REAR DISCHARGE BINDER.

The Only Binder in the market that Two Horses can handle with ease.

The only Binder that is perfectly safe to run on our rolling grounds without tipping over. Built of the best Malleable Iron and Steel, with less than half the machinery of any other binder in use.

# TRIUMPH REAPER!

A Desirable Reaper.

These Reapers are well known in this vicinity and we shall be able to supply the Extras as well as the Reapers in the future at our store, we having been appointed the agent for this vicinity.

We Carry a Full Line of Mower and Reaper Extras.

# Buckeye Mowers and Reapers.

Extras always on hand for all Buckeye Machines made at Poughkeepsie, N. Y., as well as other machines.

CHAIN GEAR,  
No. 7 Mower.

ADRIANCE PLATT & CO.,  
POUGHKEEPSIE, N.Y.

# THE FARMERS and MECHANICS FRIEND

## COMBINATION CLAMP AND DRILL.

\$2.25 with Diamond Point Drills.

Extra Drills, 10 cents each.

\$3 with Syracuse Twist Drills.

Extra Drills, 28 cents each.

# Compressed Salt Cakes and Frames,

## FOR HORSES, CATTLE AND SHEEP.

(Patented.)

Warranted Pure Dairy Salt, put under Hydraulic Pressure into Cake Form for Use of Animals.

Pure Salt Refined, acts as a tonic, invigorates the system, promotes digestion, purifies the blood, increases strength of bone and muscle; in fact, it is a stimulus for the general health and thrift of animals, as well as mankind.

Lump Rock Salt in its natural state is not pure salt. It is contaminated with foreign substances, such as Sulphates and Chlorides. 25c. per cake, 5 cakes \$1.00.

### COOPER'S SHEEP DIP SOLD BY US.

We sell the Best Cream Separator in the Market. Fully Warranted.  
We have the best Plows for the Least Money.

## .. LAMBERT'S .. *DEATH TO LICE*

Kills Lice or Fleas on Poultry, Horses, Cattle, Cats, Dogs  
Hogs, Ticks on Sheep, Lice on Plants, Carpet  
Moths, Water Bugs, Protects Furs  
and Woolens.

A DISINFECTANT INSECT POWDER.

ABSOLUTELY GUARANTEED.

This preparation is guaranteed to rid poultry of all vermin and cause them to be more healthy and profitable. You cannot see the lice on hens unless you look where they are, which is usually among the fluffy feathers beneath the vent. They center there especially during cold weather, and worry their victims worse than the seven years' itch. It will also destroy ticks on sheep, and kill hog lice instantly.

Lice on a horse will worry the animal until they kill him. Cattle also get lousy and this remedy is a safe and certain cure. In fact, lice on anything can be exterminated by the liberal use of this powder.

Setting hens well dusted during incubation will bring off a healthy brood that will need no pampering to make them grow.

Your carpets will not be moth eaten if you sprinkle this powder freely around the edges of the room before nailing down.

Used in Nearly, if not every State in the Union, Canada, British Columbia and Mexico.

PRICES: 5 Oz. Box, 10 Cts. | 48 Oz. Package, 50 Cts. | If to be sent by mail, add one  
15 Oz. Box, 25 Cts. | 100 Oz. Package, \$1.00. | cent per ounce to pay postage.

Always to be used externally. Nothing that will harm animal life. They will not eat it. Full directions with every package. For sale wholesale and retail.

There is a man up in Milford, N. H., who keeps hens in quite a large way. He says he always has about 800 fowls, and raises about a thousand chickens every year. One cold morning a neighbor met him coming from the poultry yards with a basket full of eggs, and asked him what made his hens lay so well when eggs were so high, and he replied: "I have used Bowker's Animal Meal most of the time for the past ten years, and like it very much. The fowls seem to be healthy, and I don't have any trouble about their laying. I feed it to the chicken as soon as they are a few days old, and they seem to grow fast and get to laying early."

**JUMBO POWDER GUNS, - 25 CENTS.**

Use this to apply LAMBERT'S DEATH TO LICE,  
or any other powder.

## Mann's Celebrated Bone Mills.

**DURABLE AND PRACTICAL.**

We offer the best Bone Mill on the market. Fully warranted against breakage for two years. The only machine that will cut green bone fine enough for Bantams and little chickens.

This Mill is absolutely warranted for two years, and will place it beside any Mill on the market for actual test, and practical work.

PRICES: = = \$5.25, \$7.25, \$10.25, \$12.25, \$19.00, \$23.00  
\$26.50, \$75.00.

**CALL AND SEE THEM.**

## Mann's Swinging Feed Tray

**FOR POULTRY.**

**THREE SIZES,**

18, 27 and 36 inches.

**DESCRIPTION.**—It has a swinging tray, automatic tip rod, a pair of reversible cast iron standards. (Dotted lines show Standards fastened to the side of house).

PRICE, \$1.00, \$1.25, \$1.50.

**Special Points of Merit that make it Desirable for Poultrymen :**

- The Tray is 6½ inches wide, 3 inches deep and 18-27-36 inches long.
- Is made in one piece of galvanized iron.
- Water tight. Is equally useful for water or feed. Will not rust.
- Easy to keep clean. Will not leak. Makes a splendid water fountain.
- Is suspended on two hooks. Easy to take off.
- Can put it in oven to cook food without change.
- Tips automatically and throws hen out.
- Will not tip way over, nor spill food.
- When food stands and sours, it can be scalded.

## Some of the Reasons Why Poultrymen Should FEED CLOVER MEAL. ❁ ❁

3 cents per lb. \$2 per 100 lbs.

1st. Ground clover is far superior to cut clover from the fact there is no waste, and every particle is rendered digestible, as there are no whole stems or heads as in the case with cut clover; and where poultrymen are obliged to buy green food, clover meal will be found to come nearest to the summer runs of any article on the market.

## DRINKING FOUNTAINS.

Non-Freezing, made of Galvanized Iron in two sections. Easily cleaned, will last a lifetime.  
PRICES.—For one gallon size, 50 cts.; for two gallon size, 60 cts.

**UNIVERSAL INCUBATORS AND BROODERS.**

**REASONABLE PRICE.** . . In the Universal Hatcher more is given for the money in **CONSTRUCTION, STYLE and FINISH** than in any other Incubator on the market.

**How Made.** The cases are double and every practical improvement known to modern incubator construction has been introduced in the Universal. It has always been the aim of the Company—as it will continue to be—to constantly add to the character of their machines by pursuing a progressive policy, thereby producing an incubator **Thoroughly Constructed, Attractive in Appearance, and of Lasting Durability—in other words, a Perfect Hatcher.** For full particulars see special catalogue.
